Dear Distinguished Guests,

Welcome to Taipei, Taiwan.

On behalf of the Conference Secretariat, we are taking this honor for all the penal members to thank you very much for participating in the International Conference in Commemoration of the 10th Anniversary of the 1999 Chi-Chi Earthquake. There are more than two hundred speakers from worldwide with diverse backgrounds in Earthquake Science, Earthquake Engineering, Social and Economical Impacts, Emergency Rescue and Emergency Medical Services presenting in this three-day conference. We are very glad to have them sharing their knowledge and experiences with us. If there is anything further we are not well prepared, or if you have any suggestion, please do not hesitate to advise us. We give our best efforts to prepare for this conference and look forward to meeting you in Taipei.

Sincerely yours,

Conference Secretariat

General Information

I. About the Conference

It has been ten years since the Chi-Chi Earthquake in 1999. Now it is a good time for people from worldwide to evaluate the recovery progress of Taiwan. What have we learned from the recovery process in the past ten years after the Chi-Chi Earthquake? How can we integrate the advanced technology into action for disaster risk reduction? How can we be more prepared when facing a large scale disaster? How can we work together to create a sustainable environment?

The theme of this conference is retrospection and prospection. There are five divisional topics discussed at this meeting — Earthquake Science, Earthquake Engineering, Social and Economical Impacts, Emergency Rescue, and Emergency Medical Services. All contributors of the conference are invited. The invitation list is decided by committee members of each divisional topic and is to include well-known researchers in each division. More than 200 papers will be presented in the Conference, including 40 papers by researchers from outside Taiwan and 160 papers by researchers in Taiwan. There are eight runs of sessions. Each run includes seven to nine parallel sessions.

This conference is possible because of the devotions of the conference Committee members which include National Science Council, National Central University, Disaster Management Society of Taiwan, Central Geological Survey of Ministry of Economic Affairs, National Center for Research on Earthquake Engineering, Central Weather Bureau, Architecture and Building Research Institute, Department of Health, National Disaster Prevention and Protection Commission, and the National Science and Technology Center for Disaster Reduction.

The conference will be preceded with 3-day indoor sessions in Taipei, following a 2-day on-site visit of some sites in the central part of Taiwan to see the recovery progress of the Chi-Chi Earthquake.

II. International Conference

1. Time: 17-21, September 2009, including a 3-day Conference in Taipei (17-19), and a 2-day Field Trip in central Taiwan (20-21).
2. Venue: NTUH International Convention Center, Taipei.
<http://www.thcc.net.tw/> (NTUH, National Taiwan University Hospital)
